FRAME TECHNOLOGY

At the heart of this aero-sculpted beauty is an Advanced-grade composite frame with endurance-geometry for increased control and comfort. Performance features like the PowerCore bottom bracket for optimal pedaling stiffness are blended with road-smoothing features including a longer wheelbase and taller head tube. It's the best of both worlds.

KEY UPGRADES (OVER DEFY ADVANCED 2)

- Complete 10-speed Shimano Ultegra 6700 compact component group
- Full composite fork
- Lightweight aluminum Giant Contact handlebar and stem

*Seat angle is actual

**Toptube is measured from the center of the headtube horizontally back to the top of the effective extension of the seattube

***Standover height is based on the largest size tire that will fit the bike, not necessarily the included size tire
